

Product Change Notification

Title:	Revised Chassis for V16X and V4X
Affected Products:	V16X, V4X, V16X-DC, V4X-DC
PCN Number:	PCN2501
Issue Date:	January 1 st , 2025
Contact:	support@alcorn.com

Change Description

Alcorn McBride Inc. is updating the chassis design on the V16X, V4X, V16X-DC, and V4X-DC products. Differences between the old and new chassis are focused on changes to the assembly process and materials, with little change to the visual appearance of the product.

Reason for Change

Lower weight, better mechanical robustness, and manufacturing/assembly optimizations.

Impact

This change has no impact on the function of the product. Customers should expect a decrease in weight of 3.75 pounds from the previous chassis design.

First Ship Date

Manufacturing of the updated chassis design begins in January 2025. Customer shipments will transition to the updated chassis design in Q1, 2025.
